### **7-Day Beginner & Intermediate Porcelain Workshop (40 hours)**

This **7-day intensive porcelain workshop** provides an in-depth approach to working with porcelain, focusing on its delicate and translucent surface characteristics. The workshop includes both handbuilding and molding techniques, along with glazing, decorating, and firing processes, offering a comprehensive understanding of porcelain from both technical and aesthetic perspectives.

#### **The intensive workshop covers:**

- Participants will explore how to develop food-safe colored glazes and conduct professional evaluations of glaze defects,
- Working with both soft and hard porcelain bodies using handbuilt and casting methods,
- Forming porcelain for functional and decorative pieces,
- Exploring the relationship between clay bodies and glazes to achieve aesthetic harmony,
- Understanding the firing process and testing porcelain's reaction in the kiln,
- **Exploring color development and surface aesthetics by modifying commercial glazes for optimal porcelain results.**

**Private sessions** are available throughout the year and are scheduled by appointment, depending on your production focus, interest, firing range, and preferred timing.
